Please do Not allow HR 4026 to become a law. As a commercial truck driver I depend upon both the Traffic and Weather updates to avoid trouble areas. With the current trend in fuel prices we can't afford to be held up in traffic any longer than necessary. If this bill gets passed it will cause prices on all products that are carried by the trucking industry to be raised. This will not only affect the truck owners/operators but the overall population of the United States. So please do all that you possibly can to STOP HR 4026 NOW.

Cordially Yours
Randal R. Loar
